

**Supplementary Table 1. Lesion type characteristics that required a different approach according to vertebral artery dominance**

Variable	Dominant VA (n=3)	Co-dominant (n=13)	Non-dominant (n=7)	Total (n=23)
Intimal flap	2 (66.7)	3 (23.1)	4 (57.1)	9 (39.1)
Stenosis	0	3 (23.1)	4 (57.1)	7 (30.4)
Branch involvement	2 (66.7)	5 (38.5)	4 (57.1)	11 (47.8)
Approach				
Ipsilateral VA	3 (100)	13 (100)	3 (42.9)	19 (82.6)
Bilateral and/or contralateral VA	0	0	4 (57.1)	4 (17.4)

Data are presented as number (%).  
VA, vertebral artery.
